

First of all, you have to get [DOTWEEN](http://u3d.as/aZ1) from the Asset Store :

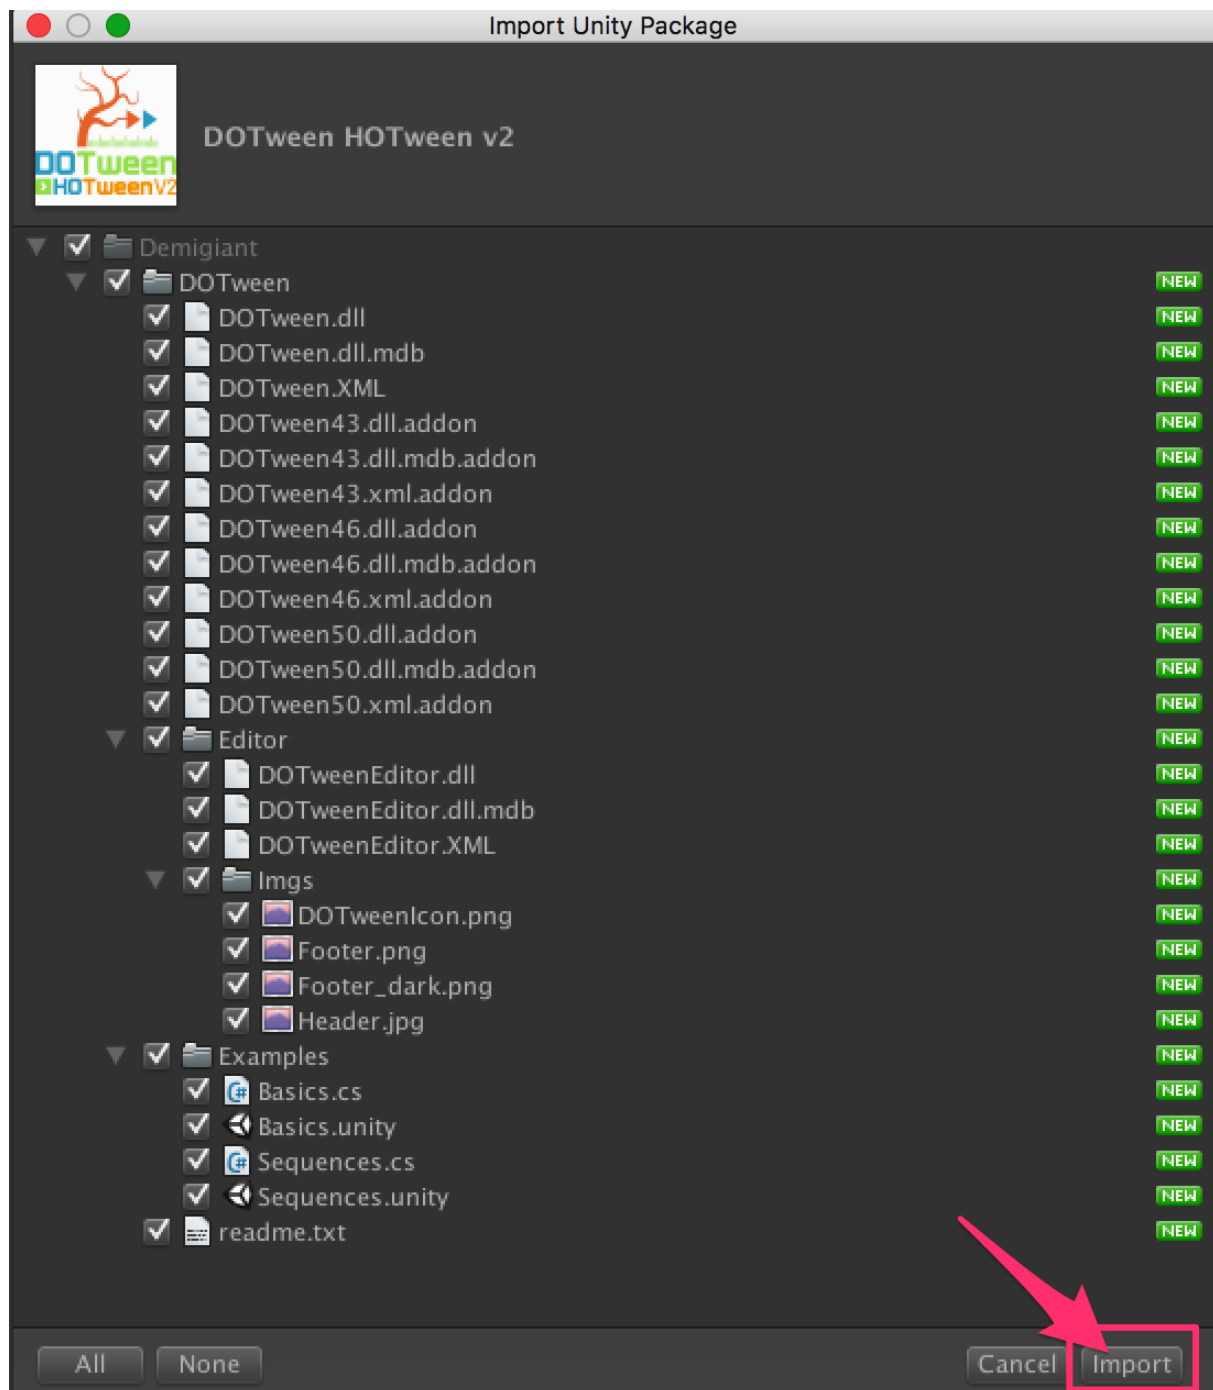

<http://u3d.as/aZ1>

(it's free)

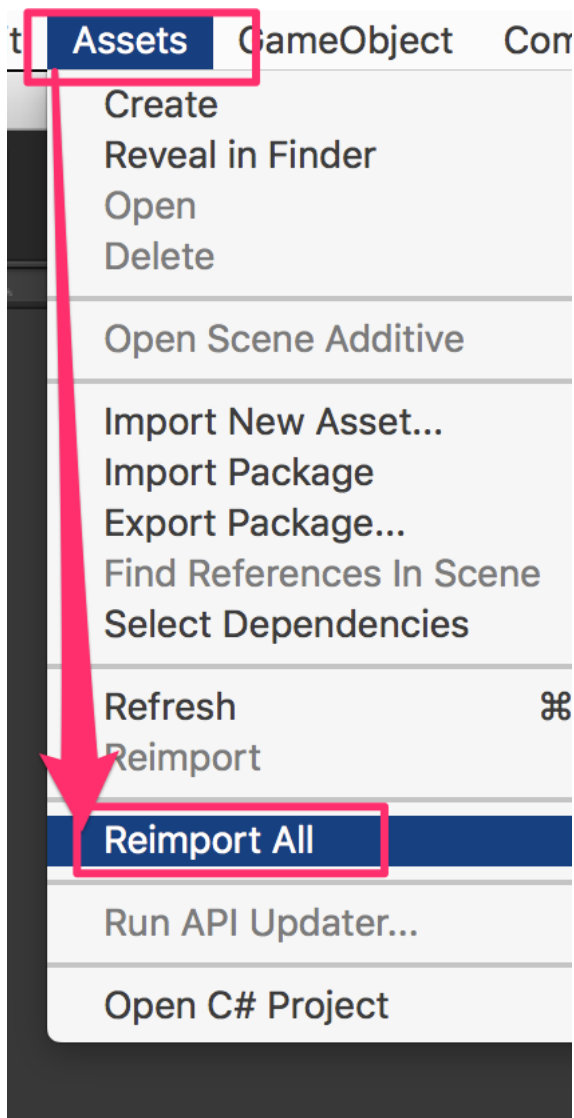

1/ Import Dotween from the asset store : <http://u3d.as/aZ1>

The screenshot shows the Unity Asset Store interface for the DOTween (HOTween v2) package. On the left, a sidebar contains the following information: Category: Scripting/Animation, Publisher: Demigiant, Rating: 5 stars (339 reviews), Your Rating: 5 stars, Price: Free. Below this is an 'Import' button, which is highlighted by a red arrow. Further down, it says 'Works also with Unity 4 and 5' and 'SEE FULL CHANGELOG HERE'. The main description states: 'DOTween is a fast, efficient, fully type-safe object-oriented animation engine, optimized for C#. It is also the evolution of HOTween, my previous Unity tween engine.' Below this, it mentions 'NEW! DOTween Pro is out, with additional shortcuts for external plugins, a Visual Path Editor, and a Visual Animation Editor.' The 'FEATURES' section lists: 'Lightweight, highly optimized, performant, memory efficient' and 'New UI 4.6, Sprite, and Unity 5 shortcuts'. The main content area features a large graphic with the DOTween logo, a code snippet 'transform.DOMoveX(100, 1); HO', and two sub-sections: 'Tweeners' (Animates values) and 'Sequence' (Animates other Tweeners and Sequences). A 'STAFF PICK' badge is also visible. On the right, a navigation menu lists various categories like Home, 3D Models, Animation, Application, Audio, Complete, Editor Ext, Particle Sy, Scripting, AI, Animati, Audio, Avatar S, Camera, Effects, GUI, Input - C, Integrati, Modelin, Network, Physics, Video, and more. At the bottom, it shows the version '1.1.135 (Dec 09, 2015)', size '204.8 kB', and release date 'Originally released: 9 January 2015'. Links for 'Support E-mail', 'Support Website', and 'Visit Publisher's Website' are also present.

2/ Import the package into Unity

3/If you don't see the « Tools » in the top of the Unity Screen, please do this :

4/Now you have the « Tools ». Open it and click on « DOTween Utility Panel ».

5/Click on « Setup DOTween ».

6/And to finish, click on the « OK » button.
